REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art fails to disclose or reasonably teach a pedicle screw assembly comprising a screw having a head with a convex portion, a receiver receiving and an elongated member and the receiver having a concave portion having a radius of curvature which is less than a radius of curvature of the convex portion of the head whereby to create an interference fit between the head and the receiver. The closest prior art Tatar (USPN 5,910,142) teaches the radius of curvatures being identical and does not expressly disclose an interference fit. Thus Claims 1-8 have been allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
